Uwaga: oświetlenie LEDowe. Nie patrzeć prosto w światło. Źródło światła w tym oświetleniu jest niewymienne; gdy źródło światła osiągnie koniec okresu użytkowania, należy wymienić całe oświetlenie.

PARTS INDICATOR

OPERATION GUIDE

Operation Instruction of the Touch Panel

- **⏻ On/Off:** In daytime or bright environment, when turning on the lamp for the first time, the light is at 70% brightness(CCT with ~5700K). In nighttime or dark environment, when turning on the lamp for the first time, the light is at 50% brightness(CCT with ~4500K).
- **🌙 Night Light:** Touch the button to turn on/off the night light.
- **🕒 Timer:** Touch the button, the light will be off after 60mins automatically. Touch again to cancel this function.
- **⬆ Up:** Touch the button to increase the brightness by 5 steps.
- **⬇ Down:** Touch the button to decrease the brightness by 5 steps.
- **Ⓜ Mode:** Touch the button to change the color temperature, Circulation with cold light, natural light and warm light.

DESCRIPTION OF THE LIGHT SENSOR

1. When Turning on/off the Lamp

In a bright environment, when turning on/off the lamp(including the night light),the light is on/off promptly, no delay. In a dark environment, when turning on/off the lamp(including the night light),the light is on/off slowly. This can protect your eyes not to be hurt by the prompt strong light in dark.

2. Automatic Identification of the Light

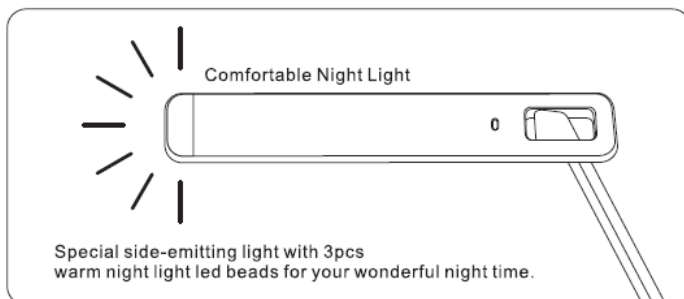

When turning on the light sensor, the light changes automatically according to the ambient light. In a bright environment, the brightness of the lamp increases automatically to bring you a better illumination. In a dark environment, the brightness of the lamp decreases automatically. The light won't be too bright to hurt your eye and brings you a nicer illumination.

3. The Night Light Can Be Off Automatically

Turning on the night light before your sleep at night, you may need the night light or you may forget to turn off the night light when you sleeping. But when daytime coming or the ambient light turning to be bright, the night light will be off automatically. Humanized design for safer and energy conservation.

If you do not like that the lamp light changes automatically, please turn off the light sensor button.

Night Light

WIRELESS CHARGER

1. If your phone has built-in wireless receiver, it will be charged directly when you put it on the charging zone of the lamp base.

2. If your phone has no built-in wireless receiver, you should buy one. Then connect the receiver to your phone, put your phone on the charging zone of the lamp base, your phone will be charged.
