

OUTDOOR

- **Waterproof:** thanks to its sealing system (IP 41), this quality metal frame clock is suitable for both indoors and outdoors.
- **Radio-controlled:** The time is permanently adjusted by radio waves from the Atomic Clock in Mainflingen. High accuracy: 1 second maximum difference in 1 million years.
- **Ergonomics:** thanks to its quiet system, the second hand emits no noise creating a framework conducive to concentration for work.
- **Robustness:** thanks to its stainless steel frame, this clock with beautiful finishes withstands any test.

- Operation: powered by a 1.5 V (AA) battery supplied
- Dimensions: diameter 35.5 cm
- Thickness: 4.5 cm
- Weight: 1.08 Kg
- Average consumption: 0,22 Am
- Quick wall fixing with 1 eyelet
- 2 years warranty
- Materials: stainless steel frame / flat mineral glass lid

USE RESTRICTIONS:

- does not work in buildings with metal structure
- does not work near a high frequency transmitter (eg PC)
- does not operate at a distance of more than 1500 km from the signal transmitter (Mainflingen in Germany) and depends on topographic conditions

UNILUX'S ADVICES

1- Why use a clock?

A clock is a must-have accessory that fits perfectly into any room in your business:

individual office

- open space
- meeting room
- Passing places
- lobby

Setting up a clock in a workspace allows employees to avoid checking the time on the smartphone or tablet time and therefore not be tempted to look at their messages or browse the internet by same occasion. Thus a clock allows to gain in concentration and productivity because the employees are less distracted.

For good readability from a distance, it is important to have:

- good contrast between the background of the dial and the color of the numbers (better contrast with white background / black numbers)
- A good height of the figures (about 3cm minimum) and in Arabic characters preferably

In addition, the choice of a clock can be made according to different needs on the part of the consumer.

1- Ideal for integrating into any type of workspace

Solution:
Quartz clocks

2- Perfect for creating a framework conducive to concentration at work

Solution:
Silent clocks

3- Automatically adjust the time permanently

Solution:
Radio-controlled clocks

2- Some definitions

Quartz system

The quartz pendulum mechanism, based on the piezoelectric phenomenon, is one of the least energy-consuming, with a reliability of one second deviation in 6 years of operation.

Radio-controlled system

The time is automatically and permanently adjusted by radio waves from the Mainflingen atomic clock (high precision: 1 second difference maximum in 1 million years)

Step movement

Second-hand movement of the second hand

Sweep movement

Continuous movement of the second hand
